HTML Assignment: Student Profile Web Page

Duration: 30 Minutes
Objective: Practice basic HTML structure, tags, and elements.

Problem Statement:

You are tasked with creating a simple **Student Profile Web Page** using only HTML. The page should display information about a student, styled using **HTML elements only (no CSS/JS)**.

Requirements:

Create an HTML page with the following sections:

1. **Title**: Set the page title as `Student Profile`.
2. **Header**: Add a heading (`<h1>`) with the student's full name.
3. **Image**: Display a profile photo of the student using the `<img>` tag (you can use a placeholder image like https://via.placeholder.com/150).
4. **Basic Info**: Use an unordered list (`<ul>`) to show:
   o Age
   o Course
   o Roll Number
   o Email Address
5. **Educational Details**: Use a table with the following columns:
   o Qualification
   o Institute
   o Year of Passing
   o Percentage
6. **About Me**: Add a short paragraph (`<p>`) about the student's interests or hobbies.
7. **Link**: Add a link (`<a>`) at the bottom that says `Visit My GitHub`, pointing to https://github.com/.
